ATTENTION! IMPORTANT!

This is what Mr. Chas. E. F. Gersdorff wrote of my Chautauqua Red in his Garden Note of Gladiolus in October number, 1922.

Chautauqua Red, brilliant flame scarlet, fine for cutting, brilliant in the garden. Spike strong and slender 46 in., 12 to 18 blooms. Fairly compact to compact, many open 3½ in. wide, open excellent substance blooming 8-12 day's, cormels prolific. Planted 5-18-22 and bloomed 7-28-22. X X X X

And this is what Mrs. Howard of the Lakeview Rose Gardens, one of the largest concerns in the U. S., says:

"Give me no other Red but Chautauqua Red; it looks like a bon-fire and I never had so much attraction in the windows."

This is what Prop. A. C. Beal of Cornell University, Ithaca, N. Y., wrote about the four Primulinus we sent him for the trial gardens.

August 8, 1922.

Mr. C. Zeestraten:

Your varieties of Gladiolus have been blooming recently. I am very certain that Gladiolus Chautauqua Red, Gladiolus Primulinus Loveliness, are worthy of registration. August 14, 1922, I am preparing certificate for Jewell, Loveliness, and Chautauqua Red. In regard to Sunrise would say that I shall be pleased to register it because the stock was fine. The question in our minds was whether Liberty and Sunrise was sufficiently distinct for us to register both of them. We agree that Sunrise is a little better than Liberty. I hope that it may be possible for you to exhibit your varieties at Kalamazoo, and hope that your Primulinus varieties which have always been of decided merit may win the coveted certificates.

NOTE. We would have made an exceptional beautiful display at the Kalamazoo Show but the flowers were ruined in transit.

This is what Raymond Champe wrote me.

"Last year you sent me some Jewell; this is the finest blend Glad. I ever saw; book me for 300 bulbs." This year he wrote, "I was so astonished about the increase that I decided to give them another trial, with the result that I have given Jewell the place by the six best varieties."

Gladiolus Primulinus

Not enough can be said about these elegant and beautiful strains of gladiolus, but they must be Primulinus; the stem must be in proportion to the flower. We have kept our strain Primulinus, and also kept the elegance and the rare and beautiful oriental colors; and for that reason we have one of the finest and unequalled collections in existence. They are not very much seen yet, but they are the coming gladiolus. Not that they will displace the large hybrids varieties, but the demand will increase very fast and steadily, as nothing is more beautiful than a vase or centerpiece of those gladiolus.

--	-------------	------------	-------------

And just the same as with any other strain of flowers, one form is more artistically or better shaped than the other, and so the same with the colors, and therefore the most of the varieties have the advantage over the mixture.

They are strong growers and rapid multipliers, and a great many bulblets blossom the first year. My *Primulinus* were awarded first prizes at the shows in Buffalo, Detroit and New York.

I can advise anybody to buy a few, and they will never regret it. The following collection is all of the finest varieties:
